

UPDATED 2012-2013 Faculty Evaluation Data Summary: Teaching, Advisement, Scholarship, Service, Recent P-12 Experience, and Overall Performance

In the 2012-2013 academic year, 35 full-time professional education unit faculty were evaluated using the annual evaluation process and instrument (this does not include three faculty who retired, left, or were not renewed for the upcoming academic year and four department heads who are evaluated by the unit head who raise the professional faculty number to 42 as referenced in Standard 5). Other college faculty were also evaluated but have been removed from the data set for this report as they do not teach courses for the unit as defined by NCATE. The numbers above represent the number (not percentage) of faculty who exceeded, met, or fell below expectations in each of the six areas.
